Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cullen, US #2,924,032.
3. Cullen teaches a display holder including two downwardly and outwardly extending flaps 10, 11, and upper panel 12 coupled between forming an inverted U-shaped supporting structure (Figures 2 and 3). Binding device 16 is attached to panel 12 and includes multiple rings 16a for supporting material thereon (column 1 line 68-column 2 line 3).
4. Cullen does not specifically teach using photographs as the display, however, this would have been obvious to a person having ordinary skill in the art. It is well known to include photographs with recipes, which are displayed in Cullen. Using such a photograph/recipe card would necessarily provide a photograph being displayed.

Art Unit: 3611

5. Also, the particular type of display (text or pictures) is considered to be entirely a matter of design choice. Patentable novelty cannot be principally predicated on mere printed matter and arrangements thereof, but must reside basically in physical structure.

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cullen as applied to claim 1 above, and further in view of Pretat, US #44,890.

7. Cullen does not show the specific fasteners used to attach binding device 16 to panel 12, however, such attachment does include some type of fastener. Pretat teaches a ring album including fasteners (Figure 4) for attaching the rigs to the middle panel. It would have been obvious to utilize such fasteners in the device of Cullen to affixed the binding device to the back portion (as is stated in Cullen). The examiner also takes official notice of fasteners used in common ring binders for holding the binding device to the back portion of the binder.

Conclusion

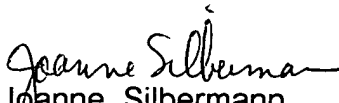

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 4365434, 3218743 and 5291677 are cited as of interest.
